

Priyanshu Prasad Gupta

priyanshoon@proton.me | github.com/priyanshoon | linkedin.com/in/priyanshoon | priyanshoon.me

EDUCATION

Asansol Engineering College

Asansol, WB

Bachelor's of Technology, Information Technology

July 2022 — June 2026

- Cumulative CGPA: 7.1/10.0 | College Level Runner-up on Smart India Hackathon 2024 (SIH24)
- Relevant Coursework: Data Structures, Program Development, Database Management System, Operating System

PROJECTS

Author, AI Agent (github.com/priyanshoon/ai-agent)

Mar 2026 — April 2026

- CLI AI agent using Gemini 2.5 Flash with system prompts, tool calls, and verbose debugging
- Secure file toolkit for sandboxed read/write/execute with validation scripts

Author & Maintainer, Bite (github.com/priyanshoon/bite)

May 2026 — Present

- Built a custom Markdown engine to convert Markdown into structured HTML.
- Added multi-page support to generate static websites from multiple Markdown files.
- Designed a modular architecture for easier maintenance and future feature expansion.

Author & Maintainer, Homelab/Home-server

Apr 2026 — Present

- Built and managed a declarative homelab on NixOS, running services like Jellyfin, qBittorrent, and a self-hosted password manager
- Secured infrastructure by restricting SSH to a private network and enforcing minimal public exposure
- Exposed services securely via Cloudflare Tunnel, eliminating the need for port forwarding

EXTRACURRICULAR ACTIVITIES

Open Source Contribution

2026 Jan — 2026 Feb

- Migrated UUID generation from UUIDv4 to UUIDv7 across multiple resources to improve temporal ordering and database indexing. [Pull Request - 1235](#)

ICETCSDP CTF 2026

2026 Jun — 2026 Jun

- Achieved 1st place in a CTF competition.
- Solved challenges in Reverse Engineering, Binary Exploitation, and Digital Forensics using low-level analysis.
- Leveraged tools such as GDB, objdump, and forensic analysis utilities to identify vulnerabilities and recover challenge artifacts.

TCS Hackquest CTF

2025 Dec — 2026 Jan

- Qualified Round 1 by solving 7+ challenges across multiple domains including web, cryptography.
- Successfully solved 2 advanced challenges in Round 2 under competitive constraints.
- Exploited web vulnerabilities such as improper input validation and authentication flaws to capture flags.

CODING GROUNDS

- [Leetcode](#): Solved over 150+ questions in leetcode. Rated 1627 currently.
- [PicoCTF](#): Solved dozens of CTF.

SKILLS

- **Programming Languages:** Python, Javascript/Typescript, Go, C/C++
- **Technologies:** REST API, PostgreSQL, Redis, MongoDB, Neovim, Git, Docker, Linux, JWT, CI/CD
- **Dev Tools:** Neovim, Git, Nix, HttpYac
